To Faculty of all university departments and affiliated colleges -**Organise free Software Training for your students**

Kumaun University announces availability of FREE Software Training in distance learning mode from MHRD, Govt. of India. Please take up this for your students. Training is provided by self-learning Audio-Video method, Spoken Tutorials, IIT Bombay. This is a simulated method providing hands-on learning of IT skills. Students can learn on their own without needing expert help and in their own college labs.

Software like Linux, Scilab, Python, PHPMySQL, C, C++, Java and many more can be learnt using this tool. It will be a good value addition to the existing teaching and training of students in IT skills. As the colleges have started the new semester, it is the apt time to plan for introducing the Software learning. The sessions are relevant for all streams Arts, Science and Commerce etc. There are courses available for each brand of study.

To get started, each college must appoint 2-3 faculty from different departments who will register on the Spoken Tutorial website and request for guidance in starting with one 2 hours first session, by writing to the Spoken Tutorial IIT Bombay Resource person. The convenient way to organize the training is to use 2-3 of the lab hours present in time-table. The students can get initial exposure to the Spoken Tutorials and continue revision and practice in their own time. Certificates from Spoken Tutorial, IIT Bombay are also provided. The day to day guidance is provided to each and every faculty by the team at IIT Bombay. To get started,
