6: Go to **Apache** tab, change **SSI Port** from 443 to 444 and save all settings.

🖂 Service Settings – 🗆 🗙								
Use this form to set service-specific and default port settings. You can set the name and default ports the XAMPP Control Panel will check. Do not include spaces or quotes in names. This does NOT change the ports that the services and programs use. You still need to change those in the services' configuration files.
