

Data Transfer between User and Kernel Space

Spoken Tutorial Project

<https://spoken-tutorial.org>

National Mission on Education through ICT

<http://sakshat.ac.in>

Mayuri Panchakshari

IIT Bombay

2 September 2020

Learning Objective

Learning Objective

In this tutorial, we will learn to copy the data from

Learning Objective

In this tutorial, we will learn to copy the data from

- Kernel space to the User space

Learning Objective

In this tutorial, we will learn to copy the data from

- Kernel space to the User space
- User space to the Kernel space

System Requirements

System Requirements

- VirtualBox 5.2

System Requirements

- **VirtualBox 5.2**
- **Ubuntu Linux 18.04 LTS
Operating System**

System Requirements

- **VirtualBox 5.2**
- **Ubuntu Linux 18.04 LTS
Operating System**
- **Linux kernel version 5.0.0-31
generic**

System Requirements

- **VirtualBox 5.2**
- **Ubuntu Linux 18.04 LTS
Operating System**
- **Linux kernel version 5.0.0-31
generic**
- **gedit text editor**

Prerequisites

Prerequisites

- C programming language

Prerequisites

- C programming language
- Basics of Linux kernel

Prerequisites

- **C programming language**
- **Basics of Linux kernel**

Prerequisites

- C programming language
- Basics of Linux kernel

If not, then go through the C/C++ and Linux spoken tutorials on this <https://spoken-tutorial.org>

Code files

Code files

- The files used in this tutorial are available in the **Code Files** link on this tutorial page

Code files

- The files used in this tutorial are available in the [Code Files](#) link on this tutorial page
- Please download and extract them

Code files

- The files used in this tutorial are available in the [Code Files](#) link on this tutorial page
- Please download and extract them
- Make a copy and then use them while practising

Summary

- **Copy the data from the kernel space to the user space**
- **Copy the data from the user space to the kernel space**

Assignment

- 1 Change the **userData** string in the **user_read_write.c** program
- 2 Load the driver into the kernel and execute the program
- 3 See the output using **dmesg** command
- 4 Unload the driver from the kernel

About the Spoken Tutorial Project

- Watch the video available at https://spoken-tutorial.org/What_is_a_Spoken_Tutorial
- It summarises the Spoken Tutorial Project
- If you do not have good bandwidth, you can download and watch it

Spoken Tutorial Workshop

The Spoken Tutorial Project Team

- Conducts workshops using spoken tutorials
- Gives certificates on passing online tests
- For more details, please write to contact@spoken-tutorial.org

Forum questions

- **Questions in THIS Spoken Tutorial?**
- **Visit**
<https://forums.spoken-tutorial.org/>
- **Choose the minute and second where you have the question**
- **Explain your question briefly**
- **The Spoken Tutorial project will ensure an answer**

You will have to register to ask questions

Forum to specific questions

- Questions not related to the Spoken Tutorial?
- Do you have general / technical questions on the Embedded Linux Device Driver?
- Please visit the FOSSEE Forum
<https://forums.fossee.in/>
- Choose the Software and post your question

Acknowledgements

Spoken Tutorial project is supported by

- **National Mission on Education through ICT (NMEICT)**
- **Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching**

Initiatives of MHRD, Government of India

THANK YOU!
