Summary

In this tutorial, we have learnt

- ▶ Declare a list of numbers using the function “array”**
- ▶ Perform element wise squaring using the “square” function**

Summary

- ▶ Use the various options available for plotting like dots, lines
- ▶ Plot experimental data such that we can also represent error by using the `errorbar()` function

Evaluation

Evaluation

1. Square the following sequence.

▶ `distance_values=[2.1,4.6,8.72,9.03]`

Evaluation

1. Square the following sequence.
 - ▶ `distance_values=[2.1,4.6,8.72,9.03]`
2. Plot L v/s T in red pluses from the Simple Pendulum Data

Solutions

1. `square (distance_values)`

Solutions

1. `square (distance_values)`
2. `plot (L, T, ' r+')`
